Dryad Features

Quick and easy submission process...

DataDryad.org is a curated general-purpose repository that makes the data underlying scientific publications discoverable, freely reusable, and citable. Dryad has integrated data submission for a growing list of journals; submission of data from other publications is also welcome.

Publishers, societies, universities, libraries, funders, and other stakeholder organizations are invited to become members. Tap into an active knowledge-sharing

Dryad Features

Site redesign

DataDryad.org is a curated general-purpose repository that makes the data underlying scientific publications discoverable, freely reusable, and citable. Dryad has integrated data submission for a growing list of journals; submission of data from other publications is also welcome.
Dryad is a nonprofit membership organization. Membership is open to any stakeholder organization, including but not limited to journals, scientific societies, publishers, research institutions, libraries, and funding organizations.

Members have a say in the governance of the organization through nomination and election of its Board of Directors and voting on amendments to its Bylaws at the Annual Meeting; receive discounts on submission fees; participate in an active knowledge sharing network; and help advance the mission of the organization through their financial support.

The Annual Meeting in May gives members the opportunity to stay informed about new innovations in the scholarly communication of research data and to help direct the future of the organization.

Membership runs from January to December; new members may join for the current year and/or the forthcoming year. Charter members have the option of deferring membership fees until January 2016; see the list of charter members below.

Membership Policy (PDF)
Features in Development

Increased curation capacity

Interoperability technologies

Added value for journals

Added value for researchers
Features in Development

Increased curation capacity – Specialized tools

Edit
Edit the dataset and data file(s)

Review
If you have reviewed the item and it is suitable for inclusion in the collection.
RECOMMENDED: "Explanation"

If you have reviewed the item and want to send it to Publication Blackout.

If you have reviewed the item and found it is not suitable for inclusion in the collection. Enter a message indicating why the item is unsuitable, and whether the submitter should change something and resubmit.

Cancel

Edit item(s)

Approve item and archive

Approve item and send to blackout

Features in Development

Added value for journals – Data display widget
Features in Development

Interoperability technologies –

- Store and display ORCIDs alongside author names
- Claim Dryad data on ORCID site
- Use ORCID to authenticate to Dryad
Features in Development

Value for researchers – Coauthor permissions

“You should spend the next week typing down names of all co-authors on your paper.”
